

ASCE HOUSTON BRANCH PARTICIPATES IN THE SCIENCE ENGINEERING FAIR OF HOUSTON

ASCE participated in the 56th annual Science Engineering Fair of Houston presented by Chevron. Held on February 28th, 2015 at the University of Houston Main Campus Alumni Center, the competition continues to successfully promote STEM (Science Technology Engineering and Math) activities in our schools. More than 1300 finalists from the surrounding 22 county areas schools (public, private, charter, home school) participated including students from the seventh grade through high school.

ASCE members Saud Memon and Umayr Syed of Arup, and Manik Mitra of Othon had the opportunity to volunteer at this year's event and were nothing short of impressed! ASCE looks forward in participating in next year's event.
