Come Learn about Concrete Pipe and Related Products. Come join ASCE for lunch and a presentation at Rinker Materials followed by a plant tour.

Our Host

Take a tour of our state-of-the-art production facility here in Houston. Observe production of reinforced concrete pipe and box, steel cage making and live demonstration of the three-edge bearing test. Learn about significance of crack in concrete pipe. This tour is intended to provide transparency into our production process and allows for Q&A from the guests. Tour begins with intro presentation into pipe production and safety orientation. Lunch is provided.
