

International Women in Engineering Day 2025

Wednesday, May 14, 2025

Dear Potential Sponsor,

We are pleased to host the second annual International Women in Engineering Day (INWED) dinner and networking event as a unique and exciting opportunity to celebrate and empower women in the engineering field. As an organization committed to fostering diversity, innovation, and education, INWED connects industry leaders, advocates, and aspiring engineers to inspire change, promote networking, and facilitate mentorship for the next generation of women in engineering. After a successful event last year, we are thrilled to bring this event back again.

The 2025 International Women in Engineering event will take place on Monday, June 23, 2025, from 5:30 pm to 8:30 pm at the Marriott – Westchase.

We invite you to join us as a sponsor for this impactful event, where we bring together influential engineers, executives, and thought leaders to foster an inclusive and empowering environment. Your sponsorship will not only support the success of the event, but also highlight your company's commitment to advancing an inclusive culture for women in engineering and allow you to gain exposure among a diverse group of attendees.

In addition to covering event costs, the sponsorship packages for this event help us to provide greater support for student participation by subsidizing ticket costs and expanding the scholarships we offer to women pursuing engineering careers. Sponsorship details are on the following pages, but additional details can also be found on our event page, at [ASCE Houston Branch - INWED Dinner](#).

In addition to the packages referenced above, we also offer the flexibility to create a custom sponsorship package tailored specifically to your goals, target audience, and budget. Let's collaborate to build a sponsorship package that's perfectly aligned with your objectives and brand vision.

We look forward to adding your company to the list of sponsors for the 2025 International Women in Engineering Day event! Our members would truly appreciate your participation.

International Women in Engineering Day 2025
