

# LIVE WEBINAR

## DESIGN OF MARINE FENDER SYSTEMS INCLUDING MANUFACTURING AND PERFORMANCE VERIFICATION.

 **DURATION: 2 HOURS (PDH available)**

The presentation gives an overview of the complete **design process** of fender systems following a holistic approach. Starting with the **berthing energy calculation process**, Mr. Polte will provide details about how to **select the right fender** for individual projects. Following the fender selection is the application of correction factors in a **case study**. The **design of the steel fender panel** is an important topic and critical issues like load case etc. will be addressed, including the relevant accessories for a fender system. The presentation closes with facts **how to manufacture a high-quality fender system**, gives details on material and performance **testing** and shares installation, operation and maintenance advices.

Your presenter  
**Mr. Dominique  
Polte, President  
SFT Inc.**

The **ShibataFenderTeam Group** is the leading international fender manufacturer with 50+ years of group experience in fender production, +100,000 fenders in service, and more than 400 references in the US alone.
